Message From The Chairman of Board of Director of MBCambodia

Dear Respected Shareholders, Investors, and Partners,

Cambodia stands as a beacon of economic openness and growth in Southeast Asia, characterized by its youthful population embracing modern consumption trends, thereby attracting global investors. Despite facing significant challenges in 2023, including national elections, new leadership transitions, a protracted trade war, protectionist policies, and the uncertainties from hostilities in Russia and Ukraine, Cambodia has shown remarkable resilience against the global economic downturn. Post-pandemic, Cambodia's growth trajectory has not only rebounded but is now among the highest in Southeast Asia. Political and economic stability have catalyzed expansion in key sectors such as transportation, tourism, telecommunications, along with steady progress in the garment, non-apparel, and service industries. Recent political and economic developments signal the new seventh-term government's ambition to elevate Cambodia to a high-middle-income country by 2030 and a high-income country by 2050.

In line with our strategy of continental expansion, MB Group has elevated its operations in Cambodia by converting MB Bank Cambodia Branch into a commercial bank. We proudly launched MB BANK (CAMBODIA) PLC in early January 2023, leveraging our extensive experience since 2011 as a branch of "MB Bank," one of Vietnam's Top 3 markets in terms of efficiency. MB BANK (CAMBODIA) PLC is poised to harness local insights and capitalize on MB Group's strengths in finance, technology, and management, committed to delivering exceptional and convenient financial services to our Cambodian customers. With significant achievements to our credit, MBCambodia continues to bolster its strengths and innovation, enhancing service quality, and customer experience, and leading the digital transformation in Cambodia's financial and banking sector. This commitment aligns with our strategic MBCambodia's long-term vision aims to deliver top banking products and services to customers with efficiency and safety.

Our successes are attributed to the collective effort, synergy, and rapid response of MBCambodia's Board of Directors, making timely decisions amidst complex developments in the Cambodian and global markets. Continuous updates from the enhanced supervision and stress testing of the financial system by the National Bank of Cambodia (NBC) have enabled us to adapt swiftly. MBCambodia has earned the trust and collaboration of leading industry in Telecommunication, Real Estate Investor and Developers, large Import-Export Enterprise, along with numerous small and medium enterprises and household businesses. This collective effort has significantly contributed to the nation's economic growth during our inaugural year as a commercial bank in Cambodia.

Looking ahead to 2024, MBCambodia is set on achieving its vision to become the most convenient bank through digital technologies while adhering to NBC regulations. To reach these goals, we are committed to investing in IT infrastructure and digital solutions to enhance customer experience, offering a market-leading digital banking platform that is secure, confidential, safe, and convenient. Additionally, we will expand our CRM machine system to provide automated banking services to our customers.

In conclusion, I am confident that with the strength of our team, the resilience of our business model, and the trust of our stakeholders, MBCambodia will continue to thrive and remain a trusted partner. Grounded in our core values of Integrity, Customer Centricity, Synergy, Agility, and Innovation, we will keep investing in our people and technologies to deliver fast and convenient banking solutions, maximizing the growth of Cambodian wealth.

On behalf of the Board of Directors of MBCambodia, I extend our sincere gratitude for the invaluable contributions and support from the leaders of the National Bank of Cambodia, government officials at all levels, our partners, and loyal customers. We appreciate the cooperation, commitment, and support of our shareholders and staff. As we embark on the next phase of development, we look forward to your continued support and assistance in helping MBCambodia swiftly grow into a leading technology-driven bank, introducing new products, services, and customer experiences to the Cambodian market.

Mr. Dinh Quang Huy Chairman of Board of Director of MBCambodia

Letter From The CEO of MBCambodia

Dear Respected Shareholders, Investors, and Partners,

MBCambodia's commitment to the sustainable development in Cambodia

In 2023, the world faced numerous economic and social challenges. From the ongoing geopolitical conflicts in the Russia-Ukraine region to the rising tensions in the Israel-Palestine area, inflationary pressures and obstacles in global supply chains were disrupted. Despite these challenges, Cambodia's GDP growth rate has reached 5.5%, showing signs of positive recovery. However, the financial market still faces many difficulties, as credit growth in Cambodia in 2023 was at 4.8% - the lowest in the past two decades, and the total industry's NPL ratio increased significantly to 5.3%.

The year 2023 marked a pivotal milestone for MBCambodia. After 11 years of operation in Cambodia, the MB Branch in Cambodia officially transformed into MB Bank (Cambodia) Plc. with 100% investment from the MB Group. In its first year as an independent entity, MBCambodia immediately introduced a wide range of high-quality financial products and services, meeting the growing demands of customers and contributing positively to Cambodia's economic development. MBCambodia achieved impressive growth in 2023 (total assets increased by 71.4%, loans grew by 73.4%, and deposits rose by 52.6%) with a NPL ratio is 0.5%, one of the lowest in the market. With a vision to become the leading bank in terms of efficiency and safety in Cambodia, alongside its main growth objectives, MBCambodia continuously enhances its risk control processes and service quality to ensure safety and reliability for its customers.

In the year 2023, MBCambodia was also honored with the "Best Company to Work for in Asia 2023" award by HR Asia. This recognition highlights the Bank's dedication to outstanding human resource management, an exemplary workplace culture, and a strong focus on the well-being and welfare of its employees.

Moreover, MBCambodia is dedicated not only to financial objectives but also to actively contributing to sustainable development and the social community. We have engaged in numerous charitable activities and social initiatives aimed at advancing a better living environment for the community and fostering Cambodia's development.

The brand new bank with a New start - New strategy

The strengths of MB Group in Vietnam, including digital banking services and advancing customer experience, have also been brought to MBCambodia and applied in the Cambodian market. The IT infrastructure at MBCambodia has been strongly invested in to enhance service capabilities and ensure customer safety. By digitizing almost all customer service processes, MBCambodia has become one of the banks with the shortest Turn-Around-Time (TAT) in the market, offering a distinctive service experience to customers and significantly improving employee productivity.

In 2023, MBCambodia also launched the advanced MyBank App platform with biometric payment updates, bringing an exciting new conveniences to our 17,779 MBCambodia customers in Cambodia. MBCambodia has also brought high-standard transaction banking models from MB Group in Vietnam to the Cambodian market by implementing and operating Smart Branches (Smartbank) equipped by CRM machines for convenient cash withdrawal and deposit activities, providing maximum convenience for customers transacting in the digital era.

As of the end of 2023, MBCambodia has provided credit to customers in Cambodia with a total new disbursement reach to USD 143.9 million, of which 59.1% was credit for individual customers and 40.9% for corporate customers. The loan portfolio primarily focused on 87.7% for production and business loans, affirming MBCambodia's commitment to supporting Cambodian business customers with the goal of advancing prosperity to the country and the people of Cambodia. In 2024, in addition to our traditional banking products, MBCambodia will continue to enhance and comprehensively develop new commercial banking products to offer to our corporate customers, including treasury management, cash management, payroll services, guarantees, and trade finance, aiming to provide even better support for the people and businesses of Cambodia.

Lastly, we would like to express our sincere gratitude and profound appreciation to our investors, customers, and valuable partners, who have always placed their trust and accompanied MBCambodia. In 2024, with unity and empowered as a team, we are determined to overcome all challenges. MBCambodia looks forward to continued receiving the understanding, supports, and collaboration from our customers, investors, and entires staff in this promising new journey. Together, we will diligently serve our customers, steadily achieve our set objectives, and deliver meaningful value to the nation and the people of Cambodia.

Chapter 1: About us

KEY MILESTONES

During 11 years of presence in the Cambodian market, the Bank has contributed to economic development, creating jobs, actively participating in social activities, contributing to building the friendship and solidarity between Vietnam and Cambodia.

Main activities of the bank include mobilizing and receiving short, medium and long term deposits from organizations and individuals; providing credit to organizations and individuals based on the nature and ability of the Bank to provide capital; Perform payment, treasury and other banking services authorized by the National Bank of Cambodia and other business activities in accordance with the provisions of law.

75M dollars

The large level of charter capital allows the bank to increase the size of its assets to expand its ability to mobilize capital in the society, expand investment, network operations, innovate banking technology.

Witnessing Cambodia's macroeconomic stability and the fast development of the banking sector. As the interbank market is still at its developmental stage, the NBC has continued developing monetary policy tools to facilitate and improve liquidity.

of Head Office near the heart of Phnom Penh Capital

The opening of a new office at #146, Preah Norodom Blvd, Sangkat Tonle Bassac, Khan Chamkamorn, Phnom Penh, Kingdom of Cambodia, marks an important milestone in the development strategies and business expansion of MB Bank. This is a crucial step taken by MB Bank Cambodia to raise its brand awareness and better serve growing demand of local customer.

MB Bank Plc., Cambodia Branch into a commercial bank, MB Bank (Cambodia) PLC.

The development of technology makes business no longer limited by border barriers, opening up a global market with limitless potential. Accordingly, enterprises owning foreign companies will solve the problem of managing and maximizing foreign cash flows.

In parallel with the process of establishing a bank with 100% capital, MB promoted to find qualified investors to become strategic partners of the bank to negotiate a joint venture plan. The joint venture with major partners will help the new bank improve its competitiveness in the market and quickly achieve the set strategic goals.

the State Bank of Vietnam to establish a bank with 100% capital in Cambodia on the basis of converting MB's branch in Cambodia.

The Branch, under the guidance and direction of MB Group, has continued to maintain its development momentum and achieve certain results, especially the Branch is always in the top of banks with lowest NPLs ratio in the market. This shows that the Branch always adheres to the motto "Sustainable Safety" in its business activities. In addition, the BOD and the BOM are always concerned about the life and health of employees, ensuring that the income level of employees in the bank is always at a competitive level compared to the market.

received the license from National Bank of Cambodia as a fully functioning commercial bank in Cambodia.

MBCambodia promises with a focus on enhancing its banking services through digital technology, offering customers a more seamless and convenient banking experience. This move towards digitalization is expected to improve accessibility, speed, and efficiency, ultimately leading to a better overall banking experience for the customers.

REPORT OF THE INDEPENDENT AUDITORS

TO: THE SHAREHOLDERS OF MB BANK (CAMBODIA) PLC.

OPINION

We have audited the financial statements of MB Bank (Cambodia) Plc. ("the Bank"), which comprise the statement of financial position as at 31 December 2023, the statement of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising material accounting policies and other explanatory information as set out on pages 8 to 81 (hereafter referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank as at 31 December 2023, and its financial performance and its cash flows for the year then ended in accordance with Cambodian International Financial Reporting Standards ("CIFRSs").

BASIS FOR OPINION

We conducted our audit in accordance with Cambodian International Standards on Auditing ("CISAs"). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Bank in accordance with the ethical requirements that are relevant to our audit of the financial statements in Cambodia, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

EMPHASIS OF MATTER -COMPARATIVE INFORMATION

OTHER MATTER RELATING TO COMPARATIVE INFORMATION We draw attention to Note 31 to the financial statements which indicates that the comparative information presented as at and for the year ended 31 December 2022, and as at 1 January 2022 has been restated. Our opinion is not modified in respect of this matter

The Bank's financial statements for the years ended 31 December 2022 and 31 December 2021 (from which the statement of financial position as at 1 January 2022 has been derived), excluding the adjustments described in Note 31 to the financial statements. were audited by another firm of auditors who expressed an unmodified opinion on those financial statements on 31 March 2023 and 13 September 2022, respectively.

As part of our audit of the financial statements as at and for the year ended 31 December 2023, we audited the adjustments described in Note 31 to the financial statements that were applied to restate the comparative information presented as at and for the year ended 31 December 2022 and the statement of financial position as at 1 January 2022. We were not engaged to audit, review or apply any procedures to the financial statements for the year ended 31 December 2022 or 31 December 2021 (not presented herein) or the statement of financial position as at 1 January 2022, other than with respect to the adjustments described in Note 31 to the financial statements. Accordingly, we do not express an opinion or any other form of assurance on those respective financial statements taken as a whole. However, in our opinion, such adjustments described in Note 31 to the financial statements are appropriate and have been properly applied.

OTHER INFORMATION

RESPONSIBILITIES OF

FOR THE FINANCIAL

STATEMENTS

MANAGEMENT AND THOSE

CHARGED WITH GOVERNANCE

Management is responsible for the other information. The other information comprises the Report of the Board of Management on pages 1 to 4, and the annual report, which is expected to be made available to us after the date of auditors' report. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management is responsible for the preparation and fair presentation of the financial statements in accordance with CIFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so

reporting process.

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with CISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

AUDITORS' RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Those charged with governance are responsible for overseeing the Bank's financial

 Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

· Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.

• Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

AUDITORS' RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

(Continued)

- · Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- · Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 December 2023

These notes form an integral part of and should be read in conjunction with the accompanying financial statements.

01	MB Bank (Cambodia) Plc. ("the Bank") was incorporated and registered in the Kingdom of Cambodia.
CORPORATE	ESTABLISHMENT AND OPERATIONS
INFORMATION	MB Bank (Cambodia) Plc. ("the Bank") was launched in early January 2023 after operating the bar business in Cambodia since 2011 as a foreign branch of Military Commercial Joint Stock Bank (MB Bank bank incorporated in Vietnam, under Banking License No. B34 issued by the Governor of the National E of Cambodia ("NBC") dated 15 December 2011 and Certificate of Incorporation with Registration No. 001 issued by the Ministry of Commerce dated 23 November 2011 and its subsequent amended license. The B
	operates in the Kingdom of Cambodia under Banking License No. 34 issued by the Governor of the Nati

"the Bank") was launched in early January 2023 after operating the banking 2011 as a foreign branch of Military Commercial Joint Stock Bank (MB Bank) - a ım, under Banking License No. B34 issued by the Governor of the National Bank 15 December 2011 and Certificate of Incorporation with Registration No. 0019719 nmerce dated 23 November 2011 and its subsequent amended license. The Bank Cambodia under Banking License No. 34 issued by the Governor of the National Bank of Cambodia ("NBC") dated 16 December 2022 and Certificate of Incorporation with Registration No. 2000222327 issued by the Ministry of Commerce dated 2 January 2023.

The principal activities of the Bank are to provide banking and related financial services in Cambodia.

The Bank's head office is located at Building 146, Preah Norodom Boulevard, Sangkat Tonle Basak, Khan Chamkar Mon, Phnom Penh, Kingdom of Cambodia. In addition, the Bank has two branches, Ou Ruessei Branch, which is located at No. 439, Preah Monivong Boulevard, Sangkat Boeng Proluet, Khan Prampir Meakkakra, Phnom Penh, Kingdom of Cambodia and Khan Chamkar Mon – Sangkat Tonle Basak Branch, which is located at Building 146, Ground Floor, Preah Norodom Blv, Sangkat Tonle Basak, Khan Chamkar Mon, Phnom Penh, Kingdom of Cambodia.

The Bank is 100% owned by Military Commercial Joint Stock Bank (the "parent bank"), a bank incorporated in Vietnam.

As at 31 December 2023, the Bank had 129 employees (31 December 2022: 62 employees).

Statement of compliance

The financial statements of the Bank have been prepared in accordance with the Cambodian International Financial Reporting Standards ("CIFRSs").

The financial statements were authorized for issue by the Board of Managements ("BOM") on 30 April 2024.

(02) MATERIAL ACCOUNTING

POLICIES

The material accounting policies adopted in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 **Basis of preparation**

2.1.1 Functional and presentation currency

The national currency of Cambodia is the Khmer Riel ("KHR"). However, as the Bank transacts its business and maintains its accounting records primarily in United States dollar ("US\$"), management has determined the US\$ to be the Bank's functional and presentation currency as it reflects the economic substance of the underlying events and circumstances of the Bank.

These financial statements are presented in US\$, which is the Bank's functional currency. All amounts have been rounded to the nearest dollar, except when otherwise indicated.

Translation of USD in KHR

The financial statements are expressed in United States Dollars which is the Bank's functional currency. The translation of United States Dollars amount into thousands Khmer Riel ("KHR'000") meets the presentation requirements pursuant to Law on Accounting and Auditing and has been done in compliance with CIAS 21-The Effects of Changes in Foreign Exchange Rates.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

for the year ended 31 December 2023

Translation of US\$ in KHR (Continued)

MATERIAL ACCOUNTING POLICIES (Continued)

(02)

Assets and liabilities are translated at the closing rate as at the reporting date and equity accounts are translated at the historical rate. The statements of profit or loss and other comprehensive income and cash flows are translated into KHR at the average rate for the year, which have been deemed to approximate the exchange rates at the date of transaction as exchange rates have not fluctuated significantly during the year. Exchange differences arising from the translation are recognised as "Currency translation differences" in the statement of comprehensive income.

The Bank uses the following exchange rates:

Financial year end		Closing Rate	Average Rate
31 December 2023	US\$1 =	KHR4,085	KHR4,110
31 December 2022	US\$1 =	KHR4,117	KHR4,087

2.1.2 Fiscal year

The Bank's fiscal year starts on 1 January and ends on 31 December.

Presentation of financial statements 21.3

The accompanying financial statements, including their utilization, are not designed for those who are not informed about the Kingdom of Cambodia's accounting principles, procedures and practices and furthermore are not intended to present the financial position and results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Kingdom of Cambodia.

The accounting policies set out below have been consistently applied by the Bank during the year.

Material accounting judgments and estimates 2.2

The preparation of the financial statements in compliance with CIFRSs requires the Bank to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosures of contingent assets and contingent liabilities. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in estimates are reflected in the financial statements as they become reasonably determinable.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The following are the critical judgments and key assumptions that have a significant risk of material adjustment to the carrying amounts of assets and liabilities within the next financial year.

2.2.1	Judgments
2.2.1.1	Classification of financial asse

On initial recognition, a financial asset is classified as measured at amortised cost, FVOCI or FVTPL.

The Bank classifies its financial assets depending on the results of the 'solely payments of principal and interest' (SPPI) tests and on the "business model" used for managing those financial assets.

ste

for the year ended 31 December 2023

(02)

2211 Classification of financial assets (Continued)

MATERIAL ACCOUNTING POLICIES (Continued)

The SPPI test is the first of two tests that determine the classification of a financial asset. When performing the SPPI test, the Bank assesses whether the contractual terms of these financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding, with interest representing time value of money and credit risk associated with the principal amount outstanding. The assessment as to whether the cash flows meet the test is made in the currency in which the financial asset is denominated. Any other contractual term that changes the timing or amount of cash flows (unless it is a variable interest rate that represents time value of money and credit risk) does not meet the amortized cost criteria.

The business model assessment (BMA) is the second test. The BMA reflects how financial assets are managed in order to generate net cash inflows. The Bank performs BMA based on the following factors:

- · Business objectives and strategies for holding financial assets;
- Performance measures and benchmarks being used to evaluate the Bank's key management personnel accountable to the financial assets;
- · Attendant risks and the tools applied in managing them;
- · Compensation structure, including whether based on fair value changes of the investments managed or on the generated cash flows from transaction;
- · Frequency and timing of disposals.

2.2.1.2 Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recognized or disclosed in the statements of financial position cannot be derived from active markets, these are determined using internal valuation techniques using generally accepted market valuation models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. These judgments may include considerations of liquidity and model inputs such as correlation and volatility for longer dated derivatives.

2.2.1.3 Leases

The Bank determines the lease term as the non-cancellable term of the lease, together with any years covered by an option to extend the lease if it is reasonably certain to be exercised, or any years covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

Extension and termination options

The Bank has several lease contracts that include extension and termination options. The Bank applies judgment in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors such as leasehold improvements and location that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Bank reassess the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate.

Estimating the incremental borrowing rate (IBR) for lease liabilities

The Bank cannot readily determine the interest rate implicit in the lease, therefore, it uses its IBR to measure lease liabilities. The IBR for lease liabilities is the rate of interest that the Bank would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the ROU asset in a similar economic environment. The Bank estimates the IBR for lease liabilities using observable inputs by reference to interest rates of deposits from customers having term similar as lease term.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

for the year ended 31 December 2023

(02) MATERIAL ACCOUNTING POLICIES (Continued)

222 Estimates

2.2.2.1 Impairment of financial assets

The measurement of impairment losses under CIFRS 9 across all categories of financial assets requires judgment, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Bank's expected credit losses (ECL) calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgments and estimates include:

- economic inputs into the ECL models.

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget and do not include restructuring activities that the Bank is not yet committed to or significant future investments that will enhance the asset's performance of the cash generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

2.2.2.2 Estimated useful lives of property and equipment and intangible assets

The useful life of each item of property and equipment and intangible assets is estimated based on the period over which the asset is expected to be available for use. Such estimation is based on a collective assessment of similar businesses, internal technical evaluation and experience with similar assets. The estimated useful life of each asset is reviewed yearly and updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the asset. It is possible, however, that future results of operations could be materially affected by changes in the amounts and timing of recorded expenses brought about by changes in the factors mentioned above. A reduction in the estimated useful life of any item of property and equipment and intangible assets would increase the recorded operating expenses and decrease the carrying value of these nonfinancial assets. There is no change in the estimated useful lives of property and equipment and intangible assets during the year.

· Criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a lifetime ECL basis and the qualitative assessment;

The segmentation of financial assets when their ECL is assessed on a collective basis;

Development of ECL models, including the various formulas and the choice of inputs;

· Determination of associations between macroeconomic scenarios and, economic inputs, such as Gross domestic product (GDP), Consumer Price Index (CPI), Unemployment Rate, other factors and the effect on probability of defaults (PDs), exposure at defaults (EADs) and loss given defaults (LGDs);

· Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the

for the year ended 31 December 2023

(02)

2.2.2.3 Recognition of deferred tax assets

MATERIAL ACCOUNTING POLICIES (Continued)

Deferred tax assets are recognized for all unused tax losses and temporary differences to the extent that it is probable that future taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and level of future taxable income together with future tax planning strategies.

2.2.2.4 Going concern

The Bank's management has made an assessment of its ability to continue as a going concern and is satisfied that it has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt on the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

2.3 Summary of material accounting policies

The accounting policies set out below have been applied consistently to all years presented in these financial statements, unless otherwise stated (Note 2.4).

The Bank has consistently applied the following accounting policies to all year presented in these financial statements, unless otherwise indicated.

The Bank also adopted Disclosure of Accounting Policies (Amendments to CIAS 1 and CIFRS Practice Statement 2) from 1 January 2023. Although the amendments did not result in any changes to the accounting policies themselves, they impacted the accounting policy information disclosed in the financial statements.

The amendments require the disclosure of 'material', rather than 'significant', accounting policies. The amendments also provide guidance on the application of materiality to disclosure of accounting policies, assisting entities to provide useful, entity-specific accounting policy information that users need to understand other information in the financial statements.

Management reviewed the accounting policies and made updates to the information disclosed in Material accounting policies (2022: Significant accounting policies) in certain instances in line with the amendments.

2.3.1 Financial assets

a. Date of recognition

All financial assets are initially recognized on the trade date, i.e., the date that the Bank becomes a party to the contractual provisions of the instrument. This includes regular way trades, purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

b. Initial recognition and subsequent measurement

All financial assets are measured initially at their fair value plus directly attributable transaction costs, except in the case of financial assets recorded at fair value through profit or loss. The Bank classify all of its financial assets based on the business model for managing the assets and the asset's contractual cash flow characteristics, measured at either:

- Amortised cost, as explained in Note 2.3.1(b)(1);
- Fair value through other comprehensive income ("FVOCI"), as explained in Note 2.3.1(b)(2); and
- Fair value through profit or loss ("FVTPL"), as explained in Note 2.3.1(b)(3).

Financial assets (Continued)

ACCOUNTING

231

(1) Financial assets at amortised cost (debt instruments)

The Bank measure financial assets at amortised cost if both of the following conditions are met:

- order to collect contractual cash flows.

The details of these conditions are outlined below:

(i) The SPPI test

premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Bank applies judgment and consider relevant factors such as the currency in which the financial asset is denominated, and the year for which the interest rate is set.

In contrast, contractual terms that introduce a more than the minimine exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVTPL.

(ii) Business model assessment

assets are managed to achieve its business objective.

- cash flows collected)
- Bank's assessment

b. Initial recognition and subsequent measurement (Continued)

Included in financial assets are the following:

· The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding; and

· The financial asset is held within a business model with the objective to hold financial assets in

As a first step of its classification process, the Bank assess the contractual terms of financial assets to identify whether they meet the SPPI test. 'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the

The Bank determines its business model at the level that best reflects how groups of financial

The Bank's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

a. How the performance of the business model and the financial assets held within that business model are evaluated and reported to the key management personnel

b. The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed

c. How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual

d. The expected frequency, value and timing of sales are also important aspects of the

for the year ended 31 December 2023

231

Financial assets (Continued) b. Initial recognition and subsequent measurement (Continued)

MATERIAL ACCOUNTING POLICIES (Continued)

- (1) Financial assets at amortised cost (debt instruments) (Continued)
 - Business model assessment (Continued) (ii)

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Bank's original expectations, the Bank do not change the classification of the remaining financial assets held in that business model but incorporate such information when assessing newly originated or newly purchased financial assets going forward

As at 31 December 2023 and 31 December 2022, the Bank classified its financial assets at amortised cost for the following Financial assets; cash on hand and other cheaue items. placements with other financial institutions and loans to customers, inter bank balances, other assets as disclosed in the respective notes to the financial statements.

Financial assets at amortized cost are subsequently measured using the effective interest rate (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

(2) Fair value through other comprehensive income ("FVOCI") (debt/equity instruments)

The Bank classifies debt instruments measured at FVOCI when both of the following conditions are met

- * The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets; and
- The contractual terms of the financial assets meet the SPPI test.

Financial assets at FVOCI are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in Other Comprehensive Income ("OCI"). Interest income and foreign exchange gains and losses are recognised in profit or loss in the same manner as for financial assets measured at amortised cost. Where the Bank holds more than one investment in the same security, they are deemed to be disposed off on a first-in first-out basis. On derecognition, cumulative gains or losses previously recognised in OCI are reclassified from OCI to profit or loss.

The Bank has no debt instrument at FVOCI as of 31 December 2023 and 31 December 2022.

Equity instruments are normally measured at FVTPL. However, for non-traded equity instruments, with an irrevocable option at inception, the Bank measures the changes through FVOCI (without recycling profit or loss upon derecognition).

The Bank has no equity instrument at FVOCI as of 31 December 2023 and 31 December 2022.

(3) Financial assets at fair value through profit or loss ("FVTPL")

Financial assets at FVTPL are those that are held-for-trading and have been either designated by management upon initial recognition or are mandatorily required to be measured at fair value under CIFRS 9. Management designates an instrument at FVTPL upon initial recognition when one of the following criteria is met:

NOTES TO THE FINANCIAL STATEMENTS (Continued)

231

for the year ended 31 December 2023

(02)

MATERIAL ACCOUNTING POLICIES (Continued)

- Financial assets (Continued)
- b. Initial recognition and subsequent measurement (Continued)
- on a different basis; or

Such designation is determined on an instrument-by-instrument basis:

Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortized cost or at FVOCI, as described above, debt instruments may be designated at fair value through profit or loss on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Subsequent to initial recognition, financial assets at FVTPL are recorded in the statement of financial position at fair value. Changes in fair value are recognised in the statement of comprehensive income under the caption of 'other operating income'.

c. Derecognition

assets) is derecognized when:

- The rights to receive cash flows from the asset have expired; or

When the Bank has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control over the asset, the asset is recognized to the extent of the Bank's continuing involvement in the asset. In that case, the Bank also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Bank has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of original carrying amount of the asset and the maximum amount of consideration that the Bank could be required to repay.

(3) Financial assets at fair value through profit or loss ("FVTPL") (Continued)

· The designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognising gains or losses on them

· The assets and liabilities are part of a group of financial assets, financial liabilities or both, which is managed, and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy.

A financial asset (or, where applicable, a part of a financial asset or part of a group of financial

• The Bank retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement;

• The Bank has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained the risk and rewards of the asset but has transferred control of the asset.

for the year ended 31 December 2023

(02)

MATERIAL

POLICIES

(Continued)

ACCOUNTING

231 Financial assets (Continued)

c. Derecognition (Continued)

The Bank derecognises a financial asset, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that, substantially, it becomes a new loan, with the difference recognised as a derecognition gain or loss, to the extent that an impairment loss has not already been recorded.

The newly recognised loans are classified as Stage 1 for ECL measurement purposes, unless the new loan is deemed to be purchased or originated credit-impaired ("POCI").

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original effective interest rate ("EIR"), the Bank records a modification gain or loss, to the extent that an impairment loss has not already been recorded.

d. Impairment of financial assets

The Bank records the allowance for expected credit losses for all loans and receivables and other debt financial assets not held at FVTPL all referred to as 'financial instruments'. Equity instruments are not subject to impairment under CIFRS 9.

ECL represents credit losses that reflect an unbiased and probability-weighted amount which is determined by evaluating a range of possible outcomes, the time value of money and reasonable and supportable information about past events, current conditions and forecasts of future economic conditions. ECL allowances are measured at amounts equal to either (i) 12-month ECL or (ii) lifetime ECL for those financial instruments which have experienced a significant increase in credit risk (SICR) since initial recognition (General Approach). The 12-month ECL is the portion of lifetime ECL that results from default events on a financial instrument that are possible within the 12 months after the reporting date. Lifetime ECL are credit losses that results from all possible default events over the expected life of a financial instrument.

Staging assessment (i)

The Bank applies a three-stage approach based on the change in credit quality since initial recognition:

3-Stage	Stage 1	Stage 2	Stage 3
approach	Performing	Under-performing	Non-performing
ECL Approach	12-month ECL	Lifetime ECL	Lifetime ECL
Criterion	No significant increase in credit risk	Credit risk increased significantly	Credit-impaired assets
Recognition of interest/profit income	On gross carrying amount	On gross carrying amount	On net carrying amount
Overdue day	Short-term (one year or less): 0-14 days Long-term (more than one year): 0-29 days	Short-term (one year or less): 15-29 days Long-term (more than one year): 30-89 days	Short-term (one year or less): 30 days and above Long-term (more than one year): 90 days and above

NOTES TO THE FINANCIAL STATEMENTS (Continued)

231

for the year ended 31 December 2023

(02)

Financial assets (Continued)

d. Impairment of financial assets (Continued)

(ii) Definition of "default" and "restored"

The Bank classifies loans, investments, receivables, or any financial asset as in default when it is credit impaired, becomes past due on its contractual payments for more than 29 days for shortterm loans and past due more than 89 days for long-term loans, restructure loans, considered non-performing, under litigation or is classified as doubtful or loss. As part of a qualitative assessment of whether a customer is in default, the Bank considers a variety of instances that may indicate unlikeliness to pay. When such events occur, the Bank carefully considers whether the event should result in treating the customer as defaulted. An instrument is considered to be no longer in default (i.e. restored) if there is sufficient evidence to support that full collection is probable and payments are received for at least six months for long-term loans and at least three months for short-term loans.

(iii) Credit risk at initial recognition

("backstop").

(iv) ECL parameters and methodologies

ECL is a function of the probability of default (PD), loss given default (LGD) and exposure at default (EAD), with the timing of the loss also considered, and is estimated by incorporating forward-looking economic information and through the use of experienced credit judgment.

The PD is an estimate of the likelihood of default over a 12-month horizon for Stage 1 or lifetime horizon for Stages 2 and 3. The PD for each individual instrument is modelled based on historic data and is estimated based on current market conditions and reasonable and supportable information about future economic conditions. The Bank segments its credit exposures based on homogenous risk characteristics and developed a corresponding PD methodology for each portfolio. The PD methodology for each relevant portfolio is determined based on the underlying nature or characteristic of the portfolio, behaviour of the accounts and materiality of the segment as compared to the total portfolio.

LGD is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from any collateral. It makes use of defaulted accounts that have either been identified as cured, restructured, or liquidated. The Bank segmented its LGD based on homogenous risk characteristics and calculated the corresponding segment-level averages.

EAD is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, and expected drawdowns on committed facilities

MATERIAL ACCOUNTING POLICIES (Continued)

At each reporting date, the Bank shall assess whether the credit risk on a loan or credit exposure has increased significantly since initial recognition. The Bank's assessment of SICR involves looking at if unpaid for at least 5 days for short-term loans and 10 days for long-term loans

for the year ended 31 December 2023

(02)

MATERIAL

POLICIES

(Continued)

ACCOUNTING

231 Financial assets (Continued)

d. Impairment of financial assets (Continued)

(v) Forward-looking information

The Bank incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL. A broad range of forward-looking information are considered as economic inputs, such as GDP growth, consumption, exchange rate, import, inflation rate and other economic indicators. The inputs and models used for calculating ECL may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

The key forward-looking economic variables used in each of the economic scenarios for the ECL calculations are Gross domestic product (GDP), Consumer Price Index (CPI), Unemployment Rate, Exchange Rate.

The Bank applies the following three alternative macroeconomic scenarios to reflect an unbiased probability-weighted range of possible future outcomes in estimating ECL:

- · Base scenario: This scenario reflects those current macroeconomic conditions continue to prevail;
- · Upside and Downside scenarios: These scenarios are set relative to the base scenario; reflecting best and worst-case macroeconomic conditions based on subject matter expert's best judgment from current economic conditions.

Financial liabilities 232

a. Date of recognition

All financial liabilities are initially recognised on the trade date i.e. the date that the Bank becomes a party to the contractual provision of the instruments.

b. Initial recognition and subsequent measurement

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability. All financial liabilities are measured initially at fair value plus directly attributable transaction costs, except in the case of financial liabilities at FVTPL.

Financial liabilities are classified as either financial liabilities at FVTPL or financial liabilities at amortised cost.

(1) Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held-for-trading ("HFT") and financial liabilities designated upon initial recognition at FVTPL.

Financial liabilities held-for-trading

Financial liabilities are classified as held-for-trading if they are incurred for the purpose of repurchasing in the near term. This category includes derivatives entered into by the Bank that do not meet the hedge accounting criteria.

Gains or losses on financial liabilities HFT are recognised in the statement of comprehensive income.

POLICIES

(Continued)

ACCOUNTING

Financial liabilities (Continued)

(1) Financial liabilities at FVTPL

Financial liabilities designated at fair value.

Financial liabilities designated upon initial recognition at FVTPL are designated at the initial date of recognition, and only if the criteria are satisfied.

The changes in fair value are presented differently as follows:

- or loss and other comprehensive income.

through profit or loss.

(2) Financial liabilities at amortized cost

This accounting policy relates to the statement of financial position captions 'Due to other financial institutions', 'Due to customer', 'Other liabilities'.

Financial liabilities at amortized cost pertain to issued financial instruments that are not classified or designated as financial liabilities at FVTPL and contain contractual obligations to deliver cash or other financial assets to the holder or to settle the obligation other than the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares. After initial measurement, other financial liabilities are subsequently measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the EIR.

c. Derecognition

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such as exchange or modification is treated as derecognition of the original liability and the recognition of a new liability. The difference between the carrying amount of the original financial liability and the consideration paid is recognized in the statement of profit or loss and other comprehensive income.

d. Offsetting of financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position of the Bank if there is a current legally enforceable right to offset the recognized amount and there is an intention to settle on a net basis or to realise the assets and settle the liabilities simultaneously.

This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the statement of financial position.

b. Initial recognition and subsequent measurement (Continued)

i. Change in fair value due to own credit risk - presented in other comprehensive income

ii. Change in fair value due to market risk or other factors - presented in the statement of profit

As of 31 December 2023, the Bank has not designated any financial liability as at fair value

for the year ended 31 December 2023

(02)

233 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either

POLICIES (Continued)

MATERIAL

ACCOUNTING

In the principal market for the asset or liability, or

· In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Bank.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

If the asset or liability measured at fair value has a bid and ask price, the price within the bid-ask spread that is most representative of fair value in the circumstances shall be used to measure fair value, regardless of where the input is categorized within the fair value hierarchy.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Bank uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- · Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- · Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- · Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

Cash and cash equivalents 2.3.4

For statement of cash flow purposes, cash and cash equivalents consist of cash and bank balances, demand deposits, and short-term highly liquid investments with original maturities of three months or less when purchased, and that are readily convertible to known amounts of cash and subject to an insignificant risk of changes in value.

Balances with the National Bank of Cambodia 2.3.5

Capital guarantee deposit and reserve balances are maintained with the NBC in compliance with the Cambodian Law on Banking and Financial Institutions determined at defined percentages of minimum capital and total deposits from customers, respectively. This account also includes current account carried at cost and interest-bearing term deposit.

Balances with other banks and financial institutions 236

Balances with other banks are carried at cost less ECL.

237 Loans and advances to customers

using the effective interest method.

Loans are written off when there is no realistic prospect of recovery. Recoveries of loans to customers previously written off, or provided for, decrease the amount of the provision allowance for expected credit losses in the income statement

in the statement of income.

Property and equipment 2.3.8

Property and equipment are stated at cost less accumulated depreciation and impairment losses, if any. The cost of a property and equipment item comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Where an item of property and equipment comprises major components having different estimated useful lives, the components are accounted for as separate items of property and equipment.

Subsequent expenditure relating to an item of property and equipment that has already been recognized is added to the carrying amount of the asset when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing asset, will flow to the Bank. All other subsequent expenditure is recognized as an expense in the year in which it is incurred.

Gain or loss arising from the retirement or disposal of an item of property and equipment is determined as the difference between the estimated net disposal proceeds and the carrying amount of the assets and is recognized in the statement of profit or loss and other comprehensive income. on the date of retirement or disposal

Depreciation is calculated on a straight-line basis over the estimated useful life of the asset as follows:

Leasehold building	4 – 5 years
Furniture and fittings	4 – 5 years
Computer and office equipment	2 – 4 years
Equipment	4 – 5 years
Motor vehicles	4 years
Other fixed assets	5 years

into operational use.

Fully depreciated assets are retained in the financial statements until they are no longer in use or no further charge for depreciation is made in respect of these assets.

expectations.

Loans to customers are measured at amortized cost less impairment based on ECL, they are initially measured at fair value plus incremental direct transaction costs, and subsequently at their amortized cost

Recoveries on loans previously written off and reversal of previous allowances are disclosed as other income

Construction in progress is not depreciated until such time as the relevant assets are completed and put

If there is any indication that there has been a significant change in depreciation or amortization rate, useful life or residual value of an asset, the depreciation of that asset is revised prospectively to reflect the new

for the year ended 31 December 2023

(02)

2.3.9 Intangible assets

MATERIAL ACCOUNTING POLICIES (Continued)

Intangible assets include software and licence which are stated at cost less accumulated amortization and accumulated impairment losses, if any. It is amortized on a straight-line basis over the estimated useful life of the asset as follows.

If there is an indication that there has been a significant change in amortization rate, useful life or residual value of software, the amortization is revised prospectively to reflect the new expectations. Software development cost is not amortized until such time as the relevant assets are completed and put into operational use.

2.3.10 Leases

At inception of a contract, the Bank assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for year of time in exchange for consideration.

To assess whether a contract conveys the right to control the use of an identified asset, the Bank assesses whether:

- The contract involves the use of an identified asset this may be specified explicitly or implicitly and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right throughout the year of use, then the asset is not identified;
- · The Bank has the right to obtain substantially all of the economic benefits from use of the asset throughout the year of use; and
- · The Bank has the right to direct the use of the asset. The Bank has this right when it has the decisionmaking rights that are most relevant to changing how and for what purpose the asset is used. In cases where all the decisions about how and for what purpose the asset is used are predetermined, the Bank has the right to direct the use of the asset if either:
- » The Bank has the right to operate the asset; or
- » The Bank designed the asset in a way that predetermines how and for what purpose It will be used.

At inception or on reassessment of a contract that contains a lease and non-lease component, the Bank allocates the consideration in the contract to each lease component and aggregate of non-lease components on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Bank has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

Leases in which the Bank is a lessee

An arrangement conveyed the right to use the asset if one of the following was met:

- . The Bank had the ability or right to operate the asset while obtaining or controlling more than an insignificant amount of the output;
- · The Bank had the ability or right to control physical access to the asset while obtaining or controlling more than an insignificant amount of the output; or

NOTES TO THE FINANCIAL STATEMENTS (Continued)

for the year ended 31 December 2023

2.3.10 Leases (Continued)

to the current market price per unit of output.

The Bank recognizes a right-of-use asset and a lease liability at the lease commencement date.

Right-of-use asset.

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is yearly reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The estimated useful of building and office for the current year is 1 - 7 years.

Lease liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, to the lessee's incremental borrowing rate. Generally, the Bank uses its incremental borrowing rate as the discount rate.

- · Fixed payments, including in-substance fixed payments;
- at the commencement date;

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when there is a change in the lease term, a change in the assessment of the option to purchase the underlying asset, a change in future lease payments arising from a change in an index or rate, or if there is a change in the Bank's estimate of the amount expected to be payable under a residual value guarantee.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero

(02)

MATERIAL

POLICIES

(Continued)

ACCOUNTING

 Facts and circumstances indicated that it was remote that other parties would take more than an insignificant amount of the output, and the price per unit was neither fixed per unit of output nor equal

Lease payments included in the measurement of the lease liability comprise:

· Variable lease payments that depend on an index or a rate, initially measured using the index or rate as

· Amounts expected to be payable under a residual value guarantee; and

• The exercise price under a purchase option that the Bank is reasonably certain to exercise, lease payments in an optional renewal period if the Bank is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Bank is reasonably certain not to terminate early.

for the year ended 31 December 2023

(02)

Short-term leases and leases of low-value assets

expense on a straight-line basis over the lease term.

MATERIAL ACCOUNTING POLICIES (Continued)

The Bank applies the short-term lease recognition exemption to its short-term leases of transportation equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option), included for short-term leases of ATM spaces. It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered of low value (i.e., below US\$5,000). Lease payments on short-term leases and leases of low-value assets are recognized as

Security deposits paid under leases

To the extent that the deposit is a true deposit and not a prepaid lease payment, the deposit gives the lessee a right to receive the money back in cash from the lessor and is therefore a financial asset for the lessee and a financial liability for the lessor.

Security deposit is initially accounted for at fair value. The excess of the principal amount of the deposit over its fair value is accounted as a prepaid lease payment. The lessee includes this amount in the cost of its rightof-use asset at the lease commencement date. Interest on the deposit, meanwhile, is accounted for using the effective interest method by both the lessee and the lessor. The fair value of the deposit is determined based on the prevailing market rate of interest for a similar loan to the lessor, considering the lessor's creditworthiness and, depending on facts and circumstances, any additional security available to the lessee.

2.3.11 Other assets

Other assets are carried at estimated realizable value. An estimate is made for doubtful receivables based on a review of outstanding amounts at the reporting date.

2.3.12 Deposits from banks and other financial institutions, deposits from customers and E-money

Deposits from banks and other financial institutions, deposits from customers and E-money are stated at placement value.

2.3.13 Equity

Bank capital

This represents the contributed capital of the Bank recognized based on the face value of contributions.

Retained earnings and Regulatory reserves

Retained earnings represent accumulated earnings of the Bank less dividends declared.

Regulatory reserves are set up for the difference between allowance for expected credit losses in accordance with CIFRS 9 and regulatory allowance in accordance with National Bank of Cambodia's Prakas No. B7-017-344 dated 1 December 2017 and Circular No. B7-018-001 Sor Ror Chor Nor dated 16 February 2018 on credit risk classification and provision on impairment for banks and financial institutions. On 16 February 2018, NBC issued Circular No. B7-018-001 clarifying on Implementation of Prakas on Credit Risk Grading and Impairment Provisioning. According to this circular, the Bank is required to calculate the allowance for impaired facilities in accordance with regulatory provision of which facilities are classified into five classes with provision rates as follows:

financial institutions in classifying their loans which have been restructured up to 31 December 2021 and in providing the regulatory allowance. This circular now requires banks and financial institutions to classify their

- Special mention, if a restructured loan is "viable" or deemed as "performing";
- Substandard, if a first-time restructured loan will need another restructuring;
- Doubtful, if a second-time restructured loan will need another restructuring; and
- · Loss, if a restructured loan is "non-viable" or deemed as "non-performing".

2.3.14 Provisions

Provisions are recognized when the Bank has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made on the amount of the obligation.

2.3.15 Revenue recognition

Interest income/expense

(i) Effective interest rate method

Interest income is recorded using the EIR method for all financial assets measured at amortised cost. Interest expense is also calculated using the EIR method for all financial liabilities held at amortised cost. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset or liability or, when appropriate, a shorter period, to the gross carrying amount of the financial asset or amortised cost of the financial liability.

The EIR (and therefore, the amortised cost of the financial asset) is calculated by taking into account transaction costs and any discount or premium on the acquisition of the financial asset, as well as fees and costs that are an integral part of the EIR. The Bank amortizated interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, the EIR calculation also takes into account the effect of potentially different interest rates that may be charged at various stages of the financial asset's expected life, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

(ii) Interest and similar income/expense

Net interest income comprises interest income and interest expense calculated using both the effective interest method and other methods. These are disclosed separately on the face of the statement of profit or loss and other comprehensive income for both interest income and interest expense to provide symmetrical and comparable information.

The Bank calculates interest income on financial assets, other than those considered creditimpaired, by applying the EIR to the gross carrying amount of the financial asset.

When a financial asset becomes credit-impaired and is therefore regarded as 'Stage 3', the Bank calculates interest income by applying the EIR to the net amortised cost of the financial asset. If the financial asset cures and is no longer credit-impaired, the Bank reverts to calculating interest income on a gross basis.

related services are performed.

A contract with a customer that results in a recognized financial instrument in the Bank's financial statements may be partially in the scope of CIFRS 9 and partially in the scope of CIFRS 15. If this is the case, then the Bank first applies CIFRS 9 to separate and measure the part of the contract that is in the scope of CIFRS 9 and then applies CIFRS 15 to the residual.

Other income

Recoveries on loans previously written off and reversal of previous allowances are recorded as other income in the statement of profit or loss and other comprehensive income.

2.3.16 Expense recognition

Expenses are recognized when it is probable that decrease in future economic benefits related to a decrease in asset or increase in liability has occurred and that the decrease in economic benefits can be measured reliably. Expenses that may arise in the course of ordinary regular activities of the Bank include, among others, the operating expenses on the Bank's operations. Expenses are recognized as incurred.

- income when the expense is incurred.
- ii. Operating expenses are recognized on an accrual basis.

2.3.17 Related parties

For the purposes of these financial statements, parties are considered to be related to the Bank if the Bank has the ability, directly or indirectly, to control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Bank and the party are subject to common control or common significant influence. Related parties may be individuals or other entities.

and key management personnel.

Key management personnel are defined as those persons having authority and responsibility for planning, directing and controlling the activities of the Bank either directly or indirectly. The key management personnel include all the Directors of the Bank, and certain senior management members of the Bank.

Key management have banking relationships with Bank entities which are entered into in the normal course of business and on substantially the same terms, including interest rates and security, as for comparable transactions with other persons of a similar standing or, where applicable, with other employees. These transactions did not involve more than the normal risk of repayment or present other unfavourable features.

Fees and commissions from providing remittance services

Fee and commission income and expense that are integral to the effective interest rate of a financial asset or financial liability are included in the effective interest rate.

ACCOUNTING

2.3.18 Income tax

Income tax expense comprises current and deferred tax. It is recognized in profit and loss except items recognized directly in equity or in other comprehensive income.

The Bank has determined that interest and penalties related to income taxes, including uncertain tax treatments, do not meet the definition of income taxes, and therefore has accounted for them under CIAS 37 Provisions, Contingent Liabilities and Contingent Assets and has recognized the related expenses in "other expenses".

(i) Current tax

Current tax comprises the expected tax payable or receivable on the taxable income for the period using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous period. It is measured using tax rates exacted or substantively enacted at the reporting date. Current tax assets and liabilities are offset only if certain criteria are met.

(ii) Deferred tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

A deferred tax asset is recognized for unused tax losses and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized; such reductions are reversed when the probability of future taxable profits improves.

Unrecognized deferred tax assets are reassessed at each reporting date and recognized to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Bank expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met.

Presentation and rounding of amounts 2.3.19

Certain corresponding figures in the financial statements have been reclassified or restated to conform with current year's presentation. Except as indicated otherwise, amounts in the financial statements have been rounded off to the nearest dollar and nearest thousands ("KHR'000") for US\$ and KHR amounts, respectively.

New and amended CIFRS Standards that are effective for the current year 2.4

(i) Deferred tax related to assets and liabilities arising from a single transaction

The Bank has adopted Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to CIAS 12) from 1 January 2023. The amendments narrow the scope of the initial recognition exemption to exclude transactions that give rise to equal and offsetting temporary differences – e.g. leases and decommissioning liabilities. For leases and decommissioning liabilities, an entity is required to recognise the associated deferred tax assets and liabilities from the beginning of the earliest comparative period presented, with any cumulative effect recognised as an adjustment to retained earnings or other components of equity at that date. For all other transactions, an entity applies the amendments to transactions that occur on or after the beginning of the earliest period presented.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

24

for the year ended 31 December 2023

(02)

MATERIAL

POLICIES

(Continued)

ACCOUNTING

The Bank previously accounted for deferred tax on leases and decommissioning liabilities by applying the 'integrally linked' approach, resulting in a similar outcome as under the amendments, except that the deferred tax asset or liability was recognised on a net basis. Following the amendments, the Bank has recognised a separate deferred tax asset in relation to its lease liabilities and a deferred tax liability in relation to its right-of-use assets. However, there was no impact on the statement of financial position because the balances qualify for offset under paragraph 74 of CIAS 12. There was also no impact on the opening retained earnings as at 1 January 2023 as a result of the change. The key impact for the Bank relates to disclosure of the deferred tax assets and liabilities recognised (see Note 15.2).

(ii) Material accounting policy information

The Bank also adopted Disclosure of Accounting Policies (Amendments to CIAS 1 and CIFRS Practice Statement 2) from 1 January 2023. Although the amendments did not result in any changes to the accounting policies themselves, they impacted the accounting policy information disclosed in the financial statements.

accounting policies are in line with the amendments.

2.5 New accounting standards, amendments and interpretations not yet adopted

A number of new accounting standards, amendments to accounting standards and interpretations that are effective for annual years beginning after 1 January 2023 and earlier application is permitted; however, the Bank has not early adopted the new or amended standards in preparing these financial statements.

The following amended accounting standards and interpretations are not expected to have a significant impact on the Bank's financial statements:

- Statement 2;
- Lease liability in a Sale and Leaseback (Amendments to CIFRS 16);
- Lack of Exchangeability (Amendments to CIAS 21).

New and amended CIFRS Standards that are effective for the current year (Continued)

(i) Deferred tax related to assets and liabilities arising from a single transaction (Continued)

The amendments require the disclosure of 'material', rather than 'significant', accounting policies. The amendments also provide guidance on the application of materiality to disclosure of accounting policies, assisting entities to provide useful, entity-specific accounting policy information that users need to understand other information in the financial statements.

Management reviewed the accounting policies and noted that there is no any update to the information disclosed in Note 2 Material accounting policies (2022: accounting policies) as all

BALANCES WITH THE NATIONAL BANK OF CAMBODIA (Continued)

(i) Negotiable Certificate of Deposit (NCD)

The Bank has pledged Negotiable Certificates of Deposits ("NCD") of US\$0 (31 December 2022: US\$11,471,581) with the NBC as collateral against the overdraft facilities with the NBC in connection with the Fast and Secure Transfer "Fast". As at 31 December 2023, the Bank had not utilised the overdraft on settlement clearing facility yet.

- (ii) Statutory deposits
- operations in Cambodia.
- (iii) Reserve deposits

the NBC as follows:

- For local currency (Khmer Riel):
- · Reserve requirement shall be maintained at 7%.

	31 December 2023	31 December 2022	
Current accounts			
USD	0.00%	0.00%	
KHR	0.00%	0.00%

Statutory deposits			
Reserve deposits – KHR	0.00%	0.00%	
Reserve deposits - USD	0.00%	0.00%	

Under the NBC's Prakas No. B7-01-136 dated 15 October 2001, the Bank is required to maintain a statutory deposit at 10% of its registered capital. This deposit is not available for use in the Bank's day-to-day operations and is refundable should the Bank voluntarily ceases its

On 9 January 2023, the NBC repealed the Prakas No. B7-020-230 on the Maintenance of Reserve Requirements against Banks and Financial Institutions' Deposits and Borrowings and issued new Prakas No. B7-023-005, which requires Banking and Financial Institutions to maintain reserve requirement against deposits and borrowings at daily average balance with

- For foreign currencies (other than Khmer Riel):
- From 1 January 2023 to 31 December 2023, reserve requirement shall be maintained at 9%.
- From 1 January 2024 onwards, reserve requirement shall be maintained at 12.5%.
- On 23 November 2023, the NBC issued the letter No. B7-023-2621 allowing Banking and Financial Institutions to maintain reserve requirement in foreign currency at 7% until 31 December 2024. The reserve requirement on customers' deposits and borrowings bears no interest.
- Annual interest rates of balances with the NBC were summarized as follows:

for the year ended 31 December 2023

(15) INCOME TAX The Bank's tax returns are subject to examination by the General Department of Taxation ("GDT"). Because the application of tax laws and regulations to many types of transactions is susceptible to varying interpretations, the amounts reported in the financial statements could change at a later date upon final determination by the GDT.

Applicable tax rates

In accordance with Cambodian tax law, the Bank has the obligation to pay tax on income ("TOI") at the rate of 20% of taxable income or minimum tax at 1% of turnover inclusive of all taxes except value-added tax, whichever is higher.

Bank capital

17

EQUITY

incorporated in Vietnam.

In 2022, the Bank converted its retained earnings amounting to US\$1,552,197 or KHR'000 6,343,829 to the Banks' capital following the approval by the BOD on 5 April 2021 and approval by the NBC on 5 July 2022.

Retained earnings and Regulatory reserves.

In Transfers between retained earnings and regulatory reserves were made to comply with the requirement of B7-017-344 Prokor, Article 73 issued by the NBC.

Regulatory reserves represented the variance between impairment losses on financial instruments in accordance with CIFRSs and the regulatory provision in accordance with the requirement of the National Bank of Cambodia.

As at 31 December 2023, the Bank transferred retained earnings to regulatory reserves of US\$94,361 (2022: Transferred from retained earnings to regulatory reserves US\$9,282).

This represents the paid-up capital contributed by Military Commercial Joint Stock Bank, a bank

A. Identity of related parties

RELATED PARTY TRANSACTIONS AND BALANCES

For the purposes of these financial statements, parties are considered to be related to the Bank if the Bank has the ability, directly or indirectly, to control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Bank and the party are subject to common control or common significant influence. Related parties may be individuals or other entities.

The Bank has related party relationships with its substantial shareholders, companies under common control and key management personnel.

Key management personnel are defined as those persons having authority and responsibility for planning, directing and controlling the activities of the Bank either directly or indirectly. The key management personnel include all the Directors of the Bank, and certain senior management members of the Bank.

Key management have banking relationships with entities which are entered into in the normal course of business and on substantially the same terms, including interest rates and security, as for comparable transactions with other persons of a similar standing or, where applicable, with other employees. These transactions did not involve more than the normal risk of repayment or present other unfavourable features.

B. Balance with related parties

FINANCIAL RISK MANAGEMENT

The Bank's activities are exposed to a variety of financial risks: credit risk, market risk (including currency risk and interest rate risk), and liquidity risk. Taking risk is core to the financial business, and operational risks are an inevitable consequence of being in business.

The Bank intends to comply with the NBC's regulations for financial risk management purposes. The Bank, however, recognizes that international best practices on risk management are yet to be fully implemented. The Board of Management has established an asset and liability management committee and risk management committee to formulate broad parameters of acceptable risk for the Bank and monitor the activities against these parameters.

The Bank holds the following financial assets and liabilities:

Capital management

The Bank's objectives when managing capital, which is a broader concept than the "equity" on the face of the statement of financial position, are:

- To comply with the capital requirements set by the NBC;
- To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To maintain a strong capital base to support the development of the business.

The Bank's policy is to maintain a strong capital base so as to maintain market confidence and to sustain further development of the business. The impact of the level of capital on shareholders' return is also recognised and the Bank recognised the need to maintain a balance between the higher returns that might be possible with greater gearing and advantages and security afforded by a sound capital position.

On 22 February 2018, the NBC issued a Prakas on Capital Buffer in Banking and Financial Institutions. According to Article 22 of this Prakas, the institution shall comply with the provisions related to the capital conservation buffer at least 50% of the conservation buffer by 1 January 2019 and fully comply by 1 January 2020. On 7 March 2018, the NBC issued a circular on the implementation of Prakas on Capital Buffer in Banking and Financial Institutions, which determines the countercyclical capital buffer at a level of 0% until a new announcement is released.

Subsequently, on 9 January 2023, the NBC issued a circular on the implementation of Prakas on Capital Buffer in Banking and Financial Institutions, which the institution shall rebuild the capital conservation buffer ratio by 1.25% and 2.5% by 30 June 2023 and 31 December 2023, respectively. For the countercyclical capital buffer, the institution shall keep at level of 0%. On 23 November 2023, the NBC issued the letter No. B7-023-2621 allowing Banking and Financial Institutions to maintain the Capital Conservation Buffer at 1.25% until 31 December 2024.

On 23 November 2023, the NBC has announced to waive the implementation of Capital Conservation Buffer at 2.5% and maintain at 1.25% until 31 December 2024. For the countercyclical capital buffer, the institution shall keep at level of 0%.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

(28)

FINANCIAL RISK

MANAGEMENT

(Continued)

The below table summarises the composition of the regulatory capital: Tier 1 capital Share capital Retained earnings (*) Audited net profit/(loss) for the last financial year Less: Intangible assets Less: Loans to related parties Tier 2 complementary capital General provision Subordinated debts approved by the National Bank of Cambodia Less: Equity participation in banking or financial institutions parties. 28.1 Credit risk

The Bank takes on exposure to credit risk, which is the risk that counterparty will cause a financial loss to the Bank by failing to discharge an obligation. Credit risk is the most important risk for the Bank's business. Credit exposure arises principally in lending activities that lead to loans to customers. The credit risk management is carried out by the credit committee.

(a) Credit risk measurement

The Bank assesses the probability of default of individual counterparties in accordance with its credit policy, procedures and practices. The credit committee is responsible for determining the appropriateness and sufficiency of its credit policies.

for the year ended 31 December 2023

(28)

(b) Risk limit control and mitigation policy

FINANCIAL RISK MANAGEMENT (Continued)

The Bank operates and provides loans to individuals within the Kingdom of Cambodia. The Bank manages limits and controls the concentration of credit risk whenever it is identified. Large exposure is defined by the NBC as overall credit exposure to any single beneficiary which exceeds 2% for individual loan and 3% for

The Bank also employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security in the form of collateral for loans to customers, which is common practice. The Bank also accepts personal guarantee for the village bank loans. The Bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans to customers are:

· Mortgages over residential properties (land, building and other properties); and

group loan of the Bank's net worth under the conditions of Prakas No. B7-07-163.

- Charges over business assets such as land and buildings.
- Customers' fixed deposits placed with the Bank; and
- · Cash in the form of margin deposit.

The table below shows the Bank's maximum exposure to credit risk before taking into account any collateral held and other credit enhancement:

	31	December 2023	31	December 2022
	US\$	KHR'000	US\$	KHR'000
		(Note 2.1.1)		(Note 2.1.1)
Balances with the NBC	35,333,360	144,336,776	26,541,705	109,272,199
Balance with other banks	12,682,265	51,807,053	3,008,902	12,387,650
Loans to customers	114,920,528	469,450,357	66,236,263	272,694,695
Other financial assets	2,809,839	11,478,192	522,662	2,151,800
	165,745,992	677,072,378	96,309,532	396,506,344

(c) Maximum exposure to credit risk

The maximum exposure to credit risks for the other financial assets is limited to the carrying value as of 31 December 2023 and 31 December 2022.

The Bank holds collateral against loans to customer in the form of real estate mortgages, guarantees, and other registered securities over assets. Estimates of fair value are based on the value of collateral assessed at the time of borrowing and are regularly updated according to internal lending policies and regulatory guidelines.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

for the year ended 31 December 2023

(28) FINANCIAL RISK MANAGEMENT

(Continued)

(d) Concentration of risks of financial assets with credit risk exposure

Concentrations arise when a number of counterparties are engaged in similar business activities or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or geographic location.

The distribution of financial assets by industry sector of the Bank, before taking into account collateral held or other credit enhancements (maximum exposure) follows:

		:	31 December 2023

FINANCIAL RISK MANAGEMENT (Continued)

28.2 Operational risk

The operational risk losses which would result from inadequate or failed internal processes, people and systems or from external factors are managed through established operational risk management processes, proper monitoring and reporting of the business activities by control and support units which are independent of the business units and oversight provided by the board of management.

The operational risk management entails the establishment of clear organizational structure, roles and control policies. Various internal control policies and measures have been implemented. These include the establishment of signing authorities, defining system parameters controls, streamlining procedures and documentation. These are reviewed continually to address the operational risks of its business.

28.3 Market risk

The Bank takes on exposure to market risk, which is the risk that the fair value or future cash flow of a financial instrument will fluctuate because of changes in market prices. Market risk arises from open positions in interest rates, currency and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices.

i. Foreign exchange risk

The Bank operates in the Kingdom of Cambodia and transacts in US\$, KHR and other foreign currencies.

Foreign exchange risk arises from future commercial transactions and recognized assets and liabilities denominated in a currency that is not the Bank's functional currency.

ii. Price risk

The Bank is not exposed to securities price risk because it does not hold any investment classified in the statement of financial position either as available for sale or at fair value through profit or loss.

iii. Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. Interest margins may increase as a result of changes and may reduce losses in the event that unexpected movements arise. The board of management of the Bank, at this stage, does not have a policy to set limits on the level of mismatch of interest rate re-pricing that may be undertaken; however, management regularly monitors the mismatch.

Interest rate risk arises from the possibility that changes in interest rates will affect future profitability or the fair values of financial instruments. The Bank is exposed to interest rate risk as a result of mismatches of interest rate re-pricing of assets and liabilities. The Bank manages this risk by matching the re-pricing of assets and liabilities through risk management strategies.

28.4 Liquidity risk

38

EINANCIAL RISK when they are view

MANAGEMENT

(Continued)

Liquidity risk is the risk that the Bank is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence of this may be the failure to meet obligations to repay depositors and fulfil commitments to lend.

reporting take nagement the form of the daily cash position and projection for the next day, week and month, respectively, as these are key years for liquidity management. Mar monitors the movements of the main depositors and projection of their withdrawals. nages the concentration and profile of debt maturities. 28.5 Fair value of financial assets and liabilities

FINANCIAL RISK MANAGEMENT (Continued)

Financial instruments comprise financial assets, financial liabilities and off-balance sheet instruments. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Bank has access at that date. The information presented herein represents the estimates of fair values as at the financial position date.

Quoted and observable market prices, where available, are used as the measure of fair values of the financial instruments. Where such quoted and observable market prices are not available, fair values are estimated based on a range of methodologies and assumptions regarding risk characteristics of various financial instruments, discount rates, estimates of future cash flows and other factors.

Fair value information for non-financial assets and liabilities are excluded as they do not fall within the scope of CIFRS 7, Financial Instruments Disclosures which requires the fair value information to be disclosed. These include investment in subsidiaries and property and equipment.

The fair value of the Bank's financial instruments such as cash and short-term funds, balances with NBC, balances with other banks, deposits from customers and banks, other assets, other liabilities and short-term borrowings are not materially sensitive to shifts in market profit rate because of the limited term to maturity of these instruments. As such, the carrying value of these financial assets and liabilities at financial position date approximate their fair values.

The methods and assumptions used by the Bank in estimating the fair value of the financial instruments are:

· Cash on hand, Balances with the NBC and with other banks

The carrying amounts approximate the fair values due to the short-term nature of these accounts.

• Loans to customers

The fair value is estimated by discounting the estimated future cash flows using the prevailing market rates of financing with similar credit risks and maturities.

Deposits and borrowings

The estimated fair value of demand deposits with no stated maturity, which includes non-interestbearing deposits, is the amount repayable on demand. The estimated fair value of long-term fixed interest-bearing deposits and other borrowings without quoted market price is based on discounted cash flows using interest rates for new debts with similar remaining maturity.

Other assets and liabilities

Due to their short duration, the carrying amounts of other liabilities in the statement of financial position are considered to be reasonable approximation of their fair values.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

for the year ended 31 December 2023

(28)

MANAGEMENT

(Continued)

Fair value hierarchy

FINANCIAL RISK

CIFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources and unobservable inputs reflect the Bank's market assumptions. The fair value hierarchy is as follows:

- includes listed equity securities and debt instruments.
- liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

measurements.

28.5 Fair value of financial assets and liabilities (Continued)

+ Level 1 - Quoted price (unadjusted) in active markets for the identical assets or liabilities. This level

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or

• Level 3 - Inputs for asset or liability that are not based on observable market data (unobservable inputs). This level includes equity instruments and debt instruments with significant unobservable components.

During the year ended 31 December 2023 and the year ended 31 December 2022, there were no transfers between Level 1 and Level 2 fair value measurements, and no transfers into and out of Level 3 fair value

for the year ended 31 December 2023

30 TAX CONTINGENCY

Comprehensive tax reassessment for the period from 1 January 2020 to 31 December 2022

On 15 June 2023, the Bank received a tax reassessment notification for comprehensive tax audit for the period from 1 January 2020 to 31 December 2022. As of the date of these financial statements, the comprehensive tax audit is still on going.

Taxes are subject to review and investigation by a number of authorities, who are enabled by law to impose severe fines, penalties and interest charges. The application of tax laws and regulations to many types of transactions are susceptible to varying interpretations.

These facts may create tax risks in Cambodia substantially more significant than in other countries. Management believes that it has adequately provided tax liabilities based on its interpretation of tax legislation. However, the relevant authorities may have different interpretations and the effects could be significant.

statements.

Besides, the Bank was under a tax audit by GDT for years from 2015 to 2019. As a result of the tax audit, the Bank had to declare additional income tax and other taxes as described in Note 31 to the financial

for the year ended 31 December 2023

(31)

COMPARATIVE

- INFORMATION
 - B. Measurement of current tax income liabilities and deferred tax; and
 - C. Presentation of statement of cash flows.

The details of the adjustments are as follows:

A. Leases

A. Leases;

(i) Recognition and measurement of right-of-use assets and lease liabilities

has identified errors in the prior years' financial statements relating to the following:

In accordance with Paragraph 22 of CIFRS 16, a lessee shall recognise a right-of-use asset and a lease liability at the commencement date of the lease. However, the Bank did not recognize the right-of use asset and lease liability for a lease contract, which had commenced on 1 November 2022, until January 2023. As a result, the following items were impacted:

During the preparation of the financial statements for the year ended 31 December 2023, the management

As at 31 December 2022:

- Right-of-use assets were understated by US\$1,541,103.
- Other liabilities were understated by US\$67,232.
- Lease liabilities were understated by US\$1,592,020 (non-current was overstated by US\$1,230,692 and current was understated by US\$355,739).

For the year ended 31 December 2022:

- Depreciation expense was understated by US\$106,324.
- Interest expenses were understated by US\$7,466.

B. Measurement of current tax income liabilities and deferred tax

The Bank identified errors in their calculation of current income tax and deferred tax for the years ended 31 December 2022 and 2021 together with the impact from the restatements mentioned herein this Note. Consequently, the following items were impacted:

As at 31 December 2021:

- Deferred tax asset was overstated by US\$27,516.
- Other assets (including tax advance) were overstated by US\$203,314.
- Deferred tax liabilities were understated by US\$322,662.
- Other liabilities were understated by US\$159,252 (including withholding tax US\$12,112 and the accrual penalty payable being understated by US\$147,140 recognised in G&A exp).

As at 31 December 2022:

- Other assets (including tax advance) were overstated by US\$147,978 (including US\$203,314 for 2021 minus US\$55,336 adjusted over income tax expense for 2022).
- Deferred tax asset was understated by US\$225,302.
- Deferred tax liability was understated by US\$601,432.
- Other liabilities were understated by US\$225,472.

For the year ended 31 December 2022:

- Income tax expense was understated by US\$29,384.

Corresponding impacts to retained earnings

C. Presentation of statement of cash flows

There were certain errors in the presentation of statement cash flows for the year ended 31 December 2022. Besides, as a result of items A and B, the statements of cash flows for the year ended 31 December 2022 was restated, as described below, to reflect the correction.

- As a result of items A and B, the retained earnings were impacted as follows:
- As at 31 December 2021, retained earnings were overstated by US\$712,744.
- As at 31 December 2022, retained earnings were overstated by US\$801,509.
